

# AuroRa®

Lighting Control Made Simple™

## wireless lighting control

integrate lighting control with your security installations

### New! from Lutron®

Add the safety and simplicity of lighting control to your security system

**wireless controller**

(car visor clip and wall-mount included)

### safety

create a safe pathway of light as you arrive home

### security

indoor lights lock to full bright, entry lights flash when alarm is activated

### simplicity

simple to install, easy to operate, pre-programmed to work right out of the box

AuroRa is a versatile system that can be installed in traditional-style or designer-style wallplates.

AuroRa shown with traditional-style wallplates (sold separately). Designer-style inserts (shown on reverse side) included with system.

### Installer Benefits:

- **simple to install** - run low voltage wire from your security panel to the AuroRa security system interface
- **versatile design** - use in traditional-style or designer-style wallplates
- **pre-programmed** - plug it in and it works instantly
- **easy to purchase** - complete system in one package
- **expands security system capability** - adds the safety, convenience, ambiance and energy savings of lighting control
- **increases profit opportunities** - provides value-added benefits to your customers and installs in under 30 minutes

### Homeowner Benefits:

- **easy to use** - dimmer turns lights on/off, slider adjusts light levels. Master control turns individual room dimmers off, or on to their locally set slider levels
- **protection for home and family** - indoor lights lock to 100% full brightness when security alarm is activated
- **enhances safety** - light a path from the car into the home
- **emergency alert** - entry lights flash signaling rescue vehicles

 **LUTRON®**

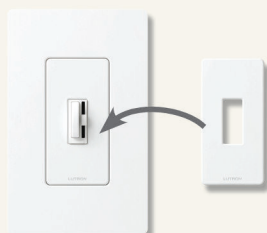

Simple to install, pre-programmed and easy to use

## AuroRa security package includes:

**Wireless Controller (1)**  
Place on the car visor, mount on a wall or carry it with you. (3) buttons control your lights: "All On" turns system lights on to full bright – "All Off" turns system lights off – "Favorite" button turns all 5 dimmers on to their locally set light levels.

**Dimmers (5)**  
Install like a switch. Adjust light levels with the slider – turn on and off by pressing the button. 600W Incandescent loads.

**Designer Inserts (5)**  
Snap on to dimmer. Use with designer-style wallplates.

**Master Control (1)**  
Plug into a standard wall outlet and place on a table or countertop. Press a room button to turn dimmer on to locally set slider level. Press "All On" to turn system lights on to full bright or "All Off" turns lights off.

**Security Interface (1)**  
Plug into a standard wall outlet and place in a central location. Supports (3) contact closure inputs:  
– Security  
– Favorite Scene  
– All Off
