### Wall Plates Specifications

#### Thermoset Plastic Wall Plates Features
- Molded of non-combustible mar-proof material.
- Available in “SP” series in Standard, Junior-Jumbo, and Jumbo sizes.
- Seven standard colors available – Ivory, White, Brown, Gray, Black, Red, and Light Almond.
- Individually wrapped with color-matching screws.
- Resistant to discoloration, grease, oil, solvent and moisture.
- Nominal thickness, .070”

#### TradeMaster® Thermoplastic Wall Plates Features
- Molded of rugged, practically indestructible self-extinguishing nylon. ("TP" series only.)
- Available in “TP” series, extra 3/16” width and height than Standard size plates; and “TPJ” series, extra 3/16” width and height than Junior-Jumbo size plates.
- Available in Ivory, White, Brown, Gray, Black, Blue, Orange, Red, and Light Almond.
- Preferred for hospital, industrial, institutional, and other high-abuse applications.
- Nominal thickness, .070”

#### Screwless Polycarbonate Wall Plates Features
- Molded of .065” thick polycarbonate with matte finish.
- Subplate made of .042” zinc-plated steel.
- Available in “SW” series, extra 1/8” width and height than Standard size plates.
- Available in Ivory, White, Gray, Black, and Light Almond.
- Oversized opening to accommodate all NEMA 26 decorator-style openings.

#### Metal Wall Plates Features
- Constructed of corrosion-resistant stainless steel, brass, aluminum, chrome, brushed bronze or galvanized steel.
- Standard, Jumbo, and Tandem size plates available, as well as special Panel size plates up to 5-gangs high and 10-gangs wide.
- Packaged in protective film, with finish-matching screws.
- Variety of special plated finishes. Paintable to match plastic plates.
- Can be silk-screened or engraved, and custom punched with over 300 opening styles.

#### Materials
- **Type 302 Stainless Steel**, non-magnetic, .032” nominal thickness, brushed finish. This alloy contains 18% chromium and 8% nickel for superior resistance to corrosion. Recommended for use in food processing plants, dairies, chemical plants, and other industrial, institutional, and commercial applications where corrosive atmospheres exist.
- Chrome, Brushed and Polished Brass, .040” thick. 70% copper, 30% zinc alloy gives warm, appealing finish to modern decor as well as retrofit applications. Lacquered to prevent corrosion.
- **Aluminum**, .040” thick. Lustrous satin finish. Lacquered to prevent corrosion.
- **Galvanized Steel**. Used only for Handy Box Plates.
- **Brushed Bronze**, .040” thick. 90% copper, 10% zinc. Lacquered to prevent corrosion.
### Wall Plates Specifications

#### Standard Size Wall Plates
- Standard size wall plates for all applications.
- Best fit for surface mount boxes.
- Available in plastic and metal only.

#### TradeMaster Wall Plates
- Extra 3/16" width and height than Standard size wall plates.
- Provide better sheet rock coverage with standard size appearance.
- Available in unbreakable nylon 6 construction only.
- Screws pre-installed in the duplex, toggle, and decorator single gang plates.

Wall Plates Dimensions

Sectional Wall Plates Features

- End and center panels with each of five most-used configurations make it possible to improvise custom wall plates on the job. Panels lock securely together on installation. Blank sections furnished with mounting strap.

Wall Plate Mountings

Illustrated are the five standard methods of plate mounting. There are many other non-standard methods which depend upon the special device used. Exact mounting hole specifications for every device appear in the Selector Guide.

Wall Plate Sizes

- SP Plates
- TP Plates
- SW Plates

Standard Size
Available in plastic and metal

Junior-Jumbo
Available in nylon only

TradeMaster Size
Available in nylon only

TradeMaster Jumbo
Available in nylon only

Screwless Wall Plate Subplate
For Screwless Wall Plate dimensions refer to Page S-3.

Tandem Wall Plates
Metal only. Plate mounting dimensions are non-standard. Refer to Page S-24 for details and devices that can be used.
These products listed to UL514, Cover Plates for Flush-Mounted Wiring Devices, CSA Certified.

### Screwless Decorator Openings

Features
- Mar-resistant wall plate.
- Fits standard size single gang electrical box.
- Nickel-plated steel.
- Connector is threaded at each end.
- Wall plate dimension is Standard size.

Features
- Decorator outline.
- Face constructed of high-impact thermoplastic.
- Zinc-plated steel strap.
- Nickel-plated “F” type connector.
- Threaded on each end.

Features
- Decorator outline.
- RJ-11 modular jack.
- Face constructed of high-impact thermoplastic.
- Nickel-plated “F” type connector.
- Threaded on each end.

UL Listed.
### Features
- Impact-resistant face and body.
- GE Lexan™ high impact-resistant lens.
- External screw-pressure-plate back and side wired. Accepts #12 and #14 AWG.
- Ground screw position under the end of the strap minimizes the risk of contact.
- Energy-efficient LED has average 20-year life expectancy: eliminates bulb replacement.
- Sensor automatically turns light ON in the dark.
- Increased light output for better illumination.
- Light sensor for enhanced sensitivity.
- Tamper-Resistant Combination Version:
  - UL tested shutter mechanism for protection against improper object insertion per UL478.
  - Specially designed for increased protection of children in their homes.
- Superior protection than traditional outlet “caps” or “protection plates.”

---

For complete line of Decorator Combination Devices, see Pages D-6 – D-10, D-17, D-19, D-25, and D-26.

All devices listed on this page conform to NEMA WD-1 and WD-6.
Specialties
Decorator Combination
Nightlight/GFCI Receptacles
15 & 20A, 125VAC

Features
- Meets 2006 UL requirements.
- SafeLock™ Protection: if critical components are damaged and ground fault protection is lost, power to receptacle is disconnected.
- Sealed nightlight with high impact-resistant Lexan® lens prevents tampering.
- Nightlight uses cooler LED illumination.
- Energy-efficient LED has average 20-year life expectancy, eliminating bulb replacement.
- Prevents line-load reversal miswire: no power to the face or downstream receptacles if wired incorrectly.
- Exceeds UL943 voltage surge requirements; survives 100x the required UL 3kA/6kV voltage surge test cycles.
- FSUL Listed (Federal Specification WC596).
- Trip indicator light (red lamp).
- Side or internal screw-pressure-plate back wire with #10 – #14 AWG solid or stranded copper wire.

Specifications
- Supply Voltage: 125VAC, 60 Hz
- Supply Voltage Range: 102-132 VAC
- Trip Time: 0.025 sec., nominal per UL Standard
- 20 Amp feed-thru capacity

</tbody>
</table>

**Application**
Lampholders and louver plates are an ideal combination for providing bright, shielded light in hallways and pathways. They increase safety in corridors, theater aisles, porches, stairways, etc. A wide choice of plates gives unlimited possibilities for designing the perfect night light installation. Available in brushed brass, custom-painted stainless steel and stainless steel.

For the complete listing of Louver Plates, see Page S-19.

**Notes:**

- Specify screws by catalog number to designate type of screw, thread, length, color or finish required.
- Screws are available by the box only.
- Order by number of boxes…not by the quantity of screws.
- Each box contains 100 screws.
- Metal screws are available with special finishes and can be painted.

Wall Plates
Custom Metal Wall Plates
Engraving & Pad Printing

Custom Engraving & Pad Printing
Most plates in this catalog can be engraved or pad printed. However, engraving plated finish metal plates is not recommended, since exposed edges could oxidize over time. Refer to current price sheet to select the better process that suits your needs.

Position
Marking may appear anywhere on the flat surface of smooth plates. On Decorator plates, markings are restricted to the top and bottom flat panels. If space permits, up to three lines can be pad printed on a plate provided the lettering fits within a 50mm circle.

Letter Height
Unless specified otherwise, designers will select size and position of letters or markings for maximum legibility. Characters per inch:

<table>
<thead>
<tr>
<th>Character per Inch</th>
<th>3/8&quot;</th>
<th>1/4&quot;</th>
<th>3/16&quot;</th>
<th>1/8&quot;</th>
<th>1/16&quot;</th>
</tr>
</thead>
<tbody>
<tr>

<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>1/16&quot; - 14</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Letter Font
Pad printing is available in any True Type font in colors listed below, on 1 gang and 2 gang plates. Bitmap images can also be printed. Laser engraving is available in any True Type font only in black (not color-filled) including bitmap images. Engraving with color fill is available only in block letter font. While mixing of laser and color-filled engraving is allowed, it is not recommended since the font types will not match.

Color
Color-filled engraving can be filled with red, orange, black, blue, or white paint. Standard colors for pad printing are red, black, blue, green, orange or white, as shown below.

<table>
<thead>
<tr>
<th>Color</th>
<th></th>
</tr>

<td></td>
</tr>
</tbody>
</table>

Ordering Instructions
Specify clearly the following information when you order.
1. Catalog number of plate(s).
2. To be engraved or pad printed.
3. Letters, numbers, characters required.
4. Position and size.
5. Color of filler, or pad printing.
6. Special layout information, if applicable.
Blank panel plates (PP-series) up to 5-gangs high and 10-gangs wide are made from Type 302 Stainless Steel. Up to 50 openings from the style selector guide can be custom punched to your specifications. For uniformity of design throughout the building, panel plates have the same distinctive styling as all other plates, plastic and metal.

**Ordering Instructions**

For this example, use the 4 gang high by 2 gang wide panel plate illustrated in Figure 2.

1. Start the catalog number with the material prefix: “SS” for Type 302 Stainless. This is a 302 Stainless plate, so the first letters of its catalog number will be “SS”.
2. Determine the catalog number for a panel plate 4 gangs high and 2 gangs wide from the table on page S-44. It is PP-4-2. Your 302 Stainless Steel catalog number is SSPP-4-2.
3. Construct a chart upon which you can indicate the opening style number for each of the 8 gangs, starting from the top left. Leave space to show any words or symbols that will be engraved. Write the catalog number SSPP-4-2 at the top of the chart. See Figure 1.
4. Refer to the Style Selector Guide and find the style numbers for each of the desired openings. Write these numbers in their appropriate position on your chart.
5. Indicate what, if any, engraving is required for each gang. Show in parentheses if engraving is to be above or below the opening.
6. Send the chart with your order to the factory. You have provided all required information. Refer to current price sheet for pricing details.

**Additional Information**

- Where no opening or mounting holes are required, specify Style #149.
- Louvered openings can be placed only on the top row of a panel plate.
- For painted or special metal finishes, refer to price sheet for price adds per gang.
- For special openings not in Selector Guide, provide detailed drawing.

**Example**

<table>
<thead>
<tr>
<th>SSPP-4-2</th>
</tr>
</thead>
</table>

Wall Plates

Custom Panel Plates

Ordering Instructions

Wall Box Dimensions
Panel Plates are limited to fit the box configuration shown.
Caution: Not all boxes are identical in overall dimensions, but are built to exact standards on device mounting holes. When boxes are connected together, they should be shimmed to ensure that the bottom hole to bottom hole dimension between two vertically adjacent boxes is 4-1/8" as errors are cumulative. Critical dimensions circled.
If additional mounting holes are required in the corners, indicate location and spacing.
