

Contracting Solutions For The Real World Prefab Wiring Solutions

Power up your productivity and pocket the profits! Respond to high labor costs and compressed schedules by utilizing products with productivity “designed in.” Womack Electric Supply Prefab Wiring Solutions can make it happen.

Boost Productivity & Your Bottom Line

Struggling to increase the productivity of your contracting business? With our Prefab Wiring Solutions, much of the typical electrical assembly is completed in advance, dramatically cutting project completion times and reducing labor cost. The bulk of these labor savings will drop straight to your bottom line!

Off The Shelf Solutions – Quick & Easy Installations

Pre-assemblies make for quick and easy installations. Off the shelf solutions include data drops, switch and outlet assemblies, masonry stubs and more. For projects that are substantial or repetitive, such as: hospitals, condominium complexes, office buildings or hotels, look to our off the shelf prefab wiring solutions

products to get the job done.

Do More With Less

Womack Prefab Wiring Solutions allow for completion of projects (large or small) with fewer employees on site, allowing you to spread out your manpower to multiple projects and pursue additional work. That’s great news at a time when good help is hard to find.

It’s simple – when it comes to the bottom line – it’s your bottom line that matters! We proudly offer UL Listed, Made in America - ARRA compliant contracting solutions for the real world, saving you time, money and labor. Try it on your next project – you and your bottom line will be glad you did!
