- Ionization Smoke Sensor
- Electrochemical Carbon Monoxide (CO) Sensor
- 120V AC with 10-Year Lithium Battery Backup
- Latching Alarm Indicator Identifies Initiating Alarm
- End-of-Life Signal
- Test/Silence Button

BENEFITS OF ALARMS WITH 10-YEAR BATTERY / BATTERY BACKUP

Improve Protection & Eliminate Call Backs

BRK 10-Year alarms provide maximum protection ensuring the home or facility is protected even if power is shut down after installation. The alarm continues to operate on the battery backup without fully draining batteries. Properties remain protected without additional maintenance.

No Service Calls! No Worries!

Minimize Liability & Nuisance

BRK 10-Year alarms have sealed and locked battery compartments. This prevents tampering and removal of the alarm battery, which is a common cause of non-functioning alarms - leaving the units unprotected and open to liability.

Install It & Done!

10-YEAR SEALED BATTERY ALARMS

**10-Year Sealed
Lithium Battery**
Eliminates Costly
Battery Replacements

SA350B SMOKE

- Ionization Smoke Sensor

- Test/Silence Button

10-Year Legislation Map

The BRK 10-year lineup complies with current 10-year legislation. Please refer to the map for states or municipalities with a 10-year requirement.*

■ States or municipalities with 10-Year Alarm requirements are shaded as indicated.*

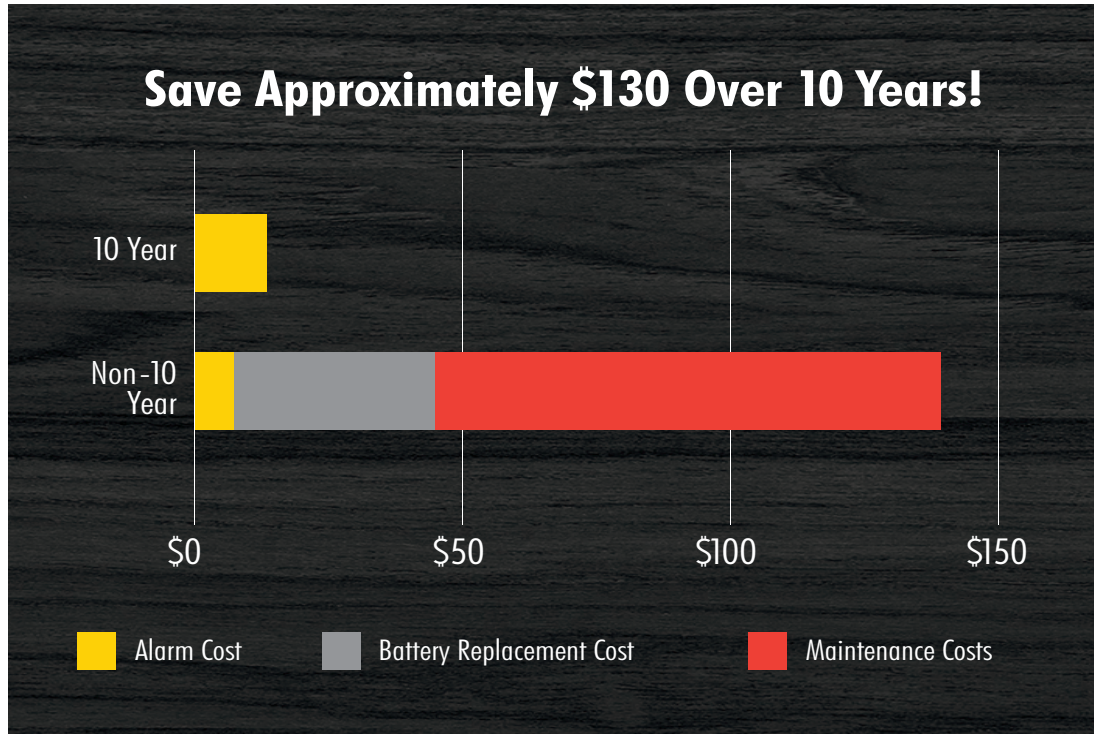

No battery replacements for the life of the alarm!

* Effective as of June 2017 and subject to change as additional legislation is passed in U.S.

Reduce Annual Maintenance & Labor Costs

A BRK 10-Year alarm is a small investment in the future. Especially in managed properties or rental units where scheduled alarm maintenance and battery replacements are both costly and time consuming for your facilities maintenance team. Eliminate the hassle and scheduling headaches with residents by installing 10-Year alarms. Save \$130 or more during the life of the alarm.*

Save Time & Money!

*Assumes 2x year battery replacement and \$25/hr labor rate on standard smoke alarm.
