

Important Parts Are Always On Hand With Our Stock Optimization Solutions CUSTOMER WAREHOUSE

Tired of running to the supply house to pick up parts before heading to the job site? Apply for Womack Electric Supply's Stock Optimization Solutions - Customer Warehouse Program and commonly used parts will always be where you need them – when you need them - right in your shop!

Like Having A Womack Electric Supply At Your Shop

When you sign up for the Customer Warehouse Program, the Womack Electric Supply team will work with you to determine which materials you need on hand at all times. Adjustable min/max stock levels are set by you and product use is tracked, managed and billed via the Womack WES Connect online portal or mobile app. Ordering and delivery are automatic, *and you aren't billed for a part until you put it to use.*

Helping You Stay Busy Without All The Busy Work

Who has time to keep track of all of those parts you use over and over on every job? We do! Pre-scheduled

site audits ensure your stock levels and repetitive supply orders are keeping pace with your supply requirements. You've got more important things to think about, so let us take this off your mind.

Cuts Cost - Increases Productivity & Efficiency

The Customer Warehouse Program cuts material cost - you're only billed for what you use. Billing is simpler when it's quick and easy to identify where and when each part was used, and best of all every part will be there when you need it - no more unnecessary, time consuming trips to the supply house.
