

COMMERCIAL & RETAIL SOLUTIONS

Commercial & Retail **Solutions**

Womack Electric Supply understands that commercial and retail facilities are where reliability, performance and customer safety matter most. Today's commercial facilities are only as effective as their electrical components and systems. Amidst an ever-changing technological landscape, we offer cutting-edge electrical products from the most respected manufacturers in the industry.

Rely on us for all of your electrical needs. We help complete projects on time and on budget. Whether you are building a new facility or renovating an existing one, Womack has the inventory, product breadth, expertise and services that deliver the best overall value.

Our **Commitment**

In commercial buildings such as offices, retail stores, restaurants, and entertainment venues; power consumption can account for more than one-third of your operating costs. We specialize in providing solutions in both energy conservation and product specification so you can focus on your customers' needs. From energy audits to retrofits and new

construction, Womack Electric is here to handle your project with care.

Established in 1938, Womack Electric's customer centric philosophy serves to focus our efforts on consistent conformance to customer expectations for quality products and professional service. We understand that our own success is a direct result of the success of those we serve. We articulate this philosophy every day in the capabilities and pride of workmanship of every Womack Electric employee serving you.

Womack Electric is proud to be a member of the Crescent Electric Supply family and is dedicated to being the leading distributor of quality products and value-added services. Crescent Electric is one of the eight largest electrical distribution companies in the U.S. Crescent Electric serves contractors, as well as, commercial, institutional and industrial customers with a broad line of electrical, lighting, industrial, automation and datacomm products from branches nationwide.

Our **Value**

Local Service, National Support

- Local, Extensive Inventory
- Convenient Locations
- Wire & Cable Management
- Pre-Fabrication Solutions
- Womack University – Training
- Online Billing & Accounting
- Customer Service Guarantees
- Estimation Software Solutions
- On-Staff Solutions Specialist
- Contractor Marketing Solutions
- Tool Sales & Service Center
- Daily Deliveries
- Kitting Capabilities
- Staging & Storage
- Custom Solutions
- 24-Hour Emergency Support
- Inventory Services & Solutions
- Project Management Services
- WES Connect - Online Ordering

WOMACK
ADVANTAGE

Lobbies & Hallways

Reducing maintenance costs, increasing employee efficiencies and ensuring a safe environment are your top priorities. Womack provides the latest products and technologies to keep your business up and running.

Charging Outlets

Offer users more options for their charging convenience. These outlets provide both USB ports and standard receptacles to allow for increased charging versatility and hold up to frequent use with exceptional durability.

Retrofit LED Lighting

Increase both energy and maintenance savings without sacrificing aesthetics. Additionally, LEDs allow for increased connectivity and controllability through Building Management Systems and POE. Low heat emissions also offer savings in climate controlling.

LED Striplights

Incorporating a smooth, linear illumination in your office setting provides a clean and classic look. Ideal for retrofit applications, strip fixtures provide optimal uplight and downlight for commercial spaces.

Modular Devices

Plug and play wiring devices make changing out outlets and switches simple and fast, saving up to five minutes of labor per device. Whether replacing one outlet, or completely rewiring a project, these devices make the job a snap.

Floor Boxes and Poke Throughs

Deliver power precisely where it is needed, when it is needed. Floor boxes allow you to safely provide and control access to electrical power, A/V, and communication devices in open spaces.

CCTV Cameras

Visual communications and the ability to see inside and outside of your facility is a necessity, even when direct line of sight is not possible. CCTV provides that capability, and adds an increased element of security to help keep your staff and patrons safe.

Self-Test Emergency Lighting

Current regulations mandate periodic testing on emergency lighting systems throughout all commercial facilities. Womack provides a wide selection of emergency lighting products to fit your application needs.

Offices & Conference Rooms

As business technology evolves, so must the electrical components that support it. We can take the worry out of your electrical system functionality, allowing your staff to concentrate on making smart business decisions.

Tunable LED Troffers and Task Lighting

Whether illuminating the entire room or an individual work station, Womack provides versatile, efficient and long lasting lighting fixtures for any office application.

Wireless Light Controls

Convenience and savings are just two of the benefits that can be achieved with wireless lighting controls. Retrofits are made easy, even if existing control wiring is not in place. Controls can also provide for upfront cost recuperation through utility rebates.

Programmable Surge Strips

Eliminating the draw of vampire loads, when devices are not in use, can result in significant energy savings. When a master product is turned off, such as an office computer, all other associated devices shut down.

Molded Multi-Outlet Strips

Convenient access to power increases operational efficiency and workspace safety. Womack offers a wide selection of products that eliminate the search for outlets and the need for extension cords.

AV System Solutions

With web meetings, remote attendees, and telecommuting employees; the need for technologically advanced meeting areas has never been greater. Womack provides you with innovative audio and visual components to ensure reliable presentation and communication solutions.

Turnkey Solutions

Take the worry of compatibility out of equipment replacement. We offer total project management and can often provide solutions with one manufacturer for product, engineering and installation, to see the job through to completion.

Food Courts & Breakrooms

Gain greater control over energy costs and working conditions with products designed specifically to provide maximum performance in large working areas.

Decorative LED Lighting

Artistic and architectural lighting can play a major part in the aesthetics of a food court or an office breakroom. LED lighting can be both visually appealing, as well as reduce relamping, maintenance and energy costs.

Plug Load Controllable Outlets

Providing additional energy usage control, whether occupancy sensor controlled or schedule controlled, these wiring devices only deliver power when needed, resulting in significant energy savings and extended life of electrical devices.

Charging Stations and Outlets

Offering employees and patrons a place to get charged-up and keeping them connected is essential in today's facilities. Let Womack serve you with cutting-edge products from leading manufactures.

Antimicrobial Treated Devices

Help combat the spread of germs to both customers and staff with these switches and wall plates. By incorporating an antimicrobial additive into the product material, these devices help to inhibit the growth of mold, mildew, fungi and bacteria on frequently touched switches and wall plates between normal cleanings.

Locking Blade Devices

In environments where electrical equipment is critical to operations, and the risk of accidental power loss must be avoided, locking blade devices ensure a secure connection. We supply a vast variety of connectors from leading manufacturers in our industry.

Cable Management and Strain Reliefs

To ensure that power cords and cables can perform their function, they must remain fixed. This not only increases the components useful life, it also reduces unscheduled maintenance and potential safety hazards.

Store Fronts

From Main Street to the mall, Womack has it all! Whether the aim is to reduce energy consumption or increase operational efficiencies, we have the right electrical products to fit your needs.

Track Lighting and Recessed Cans

Make your retail space shine and your products pop when you install a LED lighting system. Whether directing light to create a point of interest, or casting light over the entire sales floor, Womack has the fixture you're looking for.

Floor Boxes and Poke Throughs

Deliver power precisely where it is needed, when it is needed. Floor boxes allow you to safely provide control access to electrical power, A/V, and communication devices in open spaces.

Temperature Control

Heating and cooling any size facility is costly and hard to control. With modern advancement in climate control technology, it is now possible to monitor, measure, and maintain comfortable temperatures in your space from on or off site.

Self-Test Emergency Lighting

Current regulations mandate periodic testing on emergency lighting systems throughout all commercial facilities. Womack provides a wide selection of emergency lighting products to fit any application.

Speakers and Sound Systems

Communication and ambiance are two benefits to audio systems. Whether you are seeking to notify staff and guests, or create a custom environment, we can help you broadcast the message.

HDMI and Patch Cables

Media quality continues to progress and it is a vital component in successfully delivering compelling content to your customers. We can connect you with the right color and cable size to suit your needs.

Restrooms

Partner with Womack to ensure your focus remains on customer care. We offer solutions that maximize comfort, provide efficient power, controls cost and enhances safety.

LED Lighting

LED technology produces light more efficiently than traditional light sources. Womack has partnered with the industry's leading lighting manufactures to ensure you have the right light for your facility.

Ventilation Fans

Reduce odors and moisture from the air by installing quality ventilation fans. Womack offers a wide variety of quiet and efficient air exchanges and humidity control solutions.

Occupancy Sensors

Reduce energy costs by turning off lights and outlets automatically when restrooms are not in use. Increase safety by turning lights and devices on when people are present. Available for wall mount and ceiling mount applications.

Antimicrobial Treated Devices

Help combat the spread of germs to both customers and staff with these switches and wall plates. By incorporating an antimicrobial additive into the product material, these devices help to inhibit the growth of mold, mildew, fungi and bacteria on frequently touched switches and wall plates between normal cleanings.

GFCIs

Customer and staff safety is your primary concern. Installing UL listed ground-fault circuit interrupters (GFCIs) protects against electrical shock where water is present.

Emergency Lighting

Sources of natural light are not common in most commercial restrooms. Emergency lighting can help avoid various types of accidents. There is a reason these fixtures are required by code in your facilities.

Hand Dryers

Store cleanliness and personal hygiene, especially in the restroom, play a major role in the customer experience. Eliminating paper towels not only satisfies your patrons, it reduces waste and routine maintenance costs.

Data Communication

Today's businesses demand safe, reliable and resilient power to provide exceptional customer care, securely manage data, and scale for future growth.

UPS Systems

An uninterruptible power supply is a device that provides better backup when an electrical failure occurs. A UPS system can also provide alerts for servers to shut down in an efficient manner in the event of a power outage.

Fiber Optic Cable

In the midst of the information age, tremendous amounts of data must be transferred in a reliable and secure manner. Our datacomm business experts are qualified to fit your facility with the right cable solution.

Wall Duct

Utilizing raceway allows you to protect and organize cable and wire to ensure a safe working environment. Womack offers customizable duct solutions to fit any application.

CCTV Cameras

Visual communications and the ability to see inside and outside of your facility is a necessity, even when direct line of sight is not possible. CCTV provides that capability, as well as allowing for the performance of integral tasks remotely.

Security Systems

Safeguarding your establishment and the people within it is your top priority. When it comes to mitigating threats, Womack provides total system solutions.

Network Enclosures

Organizing and protecting electronic equipment, not only increases the components' life cycle, it also decreases downtime when repairs are necessary. Improve connectivity, airflow and bandwidth stability by installing network cabling and devices in proper racking and cabinets.

Ethernet Switches

Managed switches allow network segmentation and monitoring throughout your facility, providing employees and customers access to data when and where they need it. Our products keep your offer cost low and your installation simple.

Facility Management

Your area of expertise is customer service. Ours is power security and energy management. Discover how together we can help commercial facilities do more with less.

Variable Frequency Drives

Modern Drives offer increased control, easier programming, faster replacement and installation; and are more energy efficient. Connectivity options are also available, which provide the added benefit of process and asset optimization.

Standby Generators

A back-up electrical generator will operate automatically within seconds of a power outage and reduce the severity of a utility failure. Installing a standby generator outside of your facility can provide power for hours depending on the size of your facility and the amount of fuel stored on site.

Automatic Transfer Switches

Seamlessly transfer power from its origin to a backup source during a power failure or outage. We provide the right electrical products and solutions to ensure your power stays on, even in harsh environments.

Power Distribution

Specific features and functionalities are needed to make sure that power is delivered where you need it, when you need it. We can design and build custom control boxes to meet your current needs and ensure added capacity for future growth.

Sub Metering

Control, monitor and manage energy usage by utilizing a sub metering strategy. Womack has partnered with the leading manufacturers in sub metering so you can track energy usage and power consumption for individual tenants or departments to account for their actual energy usage.

Temperature Control

Heating and cooling any size facility is costly and hard to control. With modern advancement in climate control technology it is now possible to monitor, measure, and maintain comfortable temperatures in your space from on or off site.

Building Automation Systems

As mechanical systems become more complex, building automation systems (BAS) offer greater control through a centralized interface. Automating your facility allows you to track and reduce energy consumption.

Outdoor

Patrons should feel safe and comfortable outside of your facility. Womack provides energy-efficient electrical and security solutions to meet all of your exterior needs.

LED Flood Lighting

Exterior lighting is a balance of function and aesthetics. Whether to provide safety and visibility or illuminate landscaping and architectural detail, Womack will make your building shine.

Parking Lot and Garage Lighting

Many establishments are running 24/7 and facility managers are constantly looking for ways to reduce operating costs. LED's combine connectivity and controllability with reduced energy and maintenance costs, resulting in a positive impact on the bottom line.

Access Control

The first step in protecting employees, customers and property is controlling access in your facility. Womack offers sophisticated security solutions which enable administrators to control when doors can be opened and by whom.

EV Charging Stations

Electrical vehicles are now becoming economically viable for both businesses and consumers. Whether you are charging a fleet of electric vehicles or providing a place for customers to plug in away from home, Womack has the right charging solutions to meet the demand.

Photo Controls

A photocell senses when the sun is setting or rising and adjusts your lighting accordingly. Pair outdoor LED light fixtures with photo controls to reduce maintenance costs and energy consumption.

Surveillance Cameras

Security cameras allow you to monitor and record the activity happening in and around your facility. Cameras with pan, tilt, and zoom functionality give operators the ability to lock onto events and follow them with the best possible resolution. Womack offers a full range of indoor and outdoor surveillance cameras to meet security needs.
