Connecting Challenges to Solutions

Resolve One is in the business of supplying custom ideas, strategy and product-service solutions that keep projects profitable and on schedule. We make projects repeatable and predictable, by improving actions – allowing key stakeholders to better plan, organize, direct and control project variables. Our products and services streamline projects from beginning to end, increasing productivity, reducing labor and waste, saving time and money.

With decades of experience in the electrical construction industry; the solutions specialists at Resolve One know what it takes to run a successful job site. We work directly with you to analyze need, design, create and implement solutions for projects large or small.

Our solutions are designed to effectively address project constraints such as time, cost, and scope/performance.

Make Resolve One Inc., your solutions source and save time, labor, and money on your next project!

CORE COMPETENCIES

FABRICATION & FINISHING

• Design • Welding • Laser Cutting • Press Brake • Sheering • Riveting • Galvanizing • Powder Coating

ELECTRICAL PRE-FABRICATION

• Design • Assembly • Pre-Wire • Repairs • Upgrades • Transformer Racks • Duct Bank • Flex Whips
• Control Panels • Temp Power • Supports • FASS Racks • Labeling Solutions • Power Risers

STAGING & STORAGE

• Materials Receiving • Spec Verification • Freight Claims • Conditioned Storage • Schedule Releases
• Live Inventory Access & Tracking

UL LISTINGS

• Electrical Assemblies - E470935 • Incandescent Luminaires - E480090 • Conduit & Cable Hardware (RESI-FASS Rack) - E473231 • Enclosures - E496552 • Control Panel Shop - UL508A

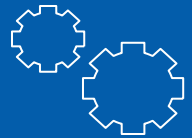

OUR CLIENTS

are our best advertisement.

"Resolve One was able to store \$1.3 million worth of fixtures in their staging area. Their team was able to detect defects and handle with the manufacturer and/or logistics company before they made it to the job site. While in storage, a large majority of the fixtures were pre-whipped, making installation a much more efficient process. When a specific fixture type was determined to have a lens defect by the manufacturer, the lenses were swapped out and fixtures repacked before coming to the job site, averting a large-scale warranty issue on the job site, as well as a headache for the contractor. Fixtures were also delivered on an as needed basis to the job site, which prevented the typical job site storage, damage and misplacement issues."

Bryant Durham Electric Co.*

DIFFERENTIATORS

- *Solutions bridging design, application, equipment, and successful installation*
- *Project consultation – needs analysis reviews*
- *In-house design, UL fabrication & finishing workshop*
- *ARRA compliant – Made in America*
- *Reigns in project constraints via accurate estimations*
- *Resolves skilled worker and labor shortages*
- *Ensures efficient use of time and labor on projects*
- *Staging and storage eliminates long lead times*
- *In-storage, pre-wires & repairs eliminate downtime*
- *Custom solutions for all construction markets*
